

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- **2-8 people** recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

① 10 minutes

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Open article

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run an smooth and productive session

Defer judgment.

Go for volume.

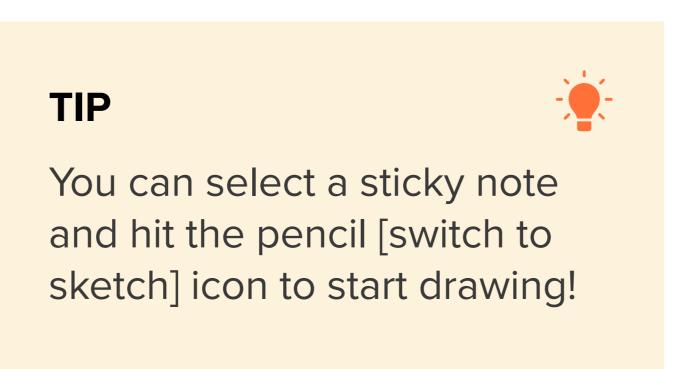

Brainstorm

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

ASHOK B

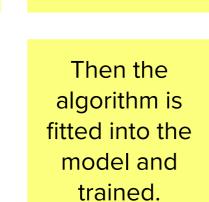

Fetching the possible data from various resources.	Fetching the data in a large amount.	Gathering all data from various file formats .csv .json .xls
Gathering all the collected data togeather.	Go through the collected data.	Deeply go through the collected data and look more data can be collected.

DHANUSH M

Gathering the data and doing the cleaning process.	Cleaning process take a big part in the model training.	Find a best algorithm to train an efficient model.
Data cleaning to increase the efficiency of the model.	Get the desired accuracy.	Make sure the collected data satisfies the problem

DHINAKARAN R

Make sure the data is cleaned very well.	Check the columns data types.	Check for Nan values and as well as missing values.
Check for outliers and detect the	Choose the best algorithm to fit the model and	Increase the model's accuracy by

ELANKATHIR S

Train the model with the desired algorithm.	Train the model more than one algorithm.	And check the efficiency of each algorithm.
At the end of the training the model we need to check the accuracy scores.	Compare the various models efficiencies and look the results.	Choose the model which has the desired efficiency.

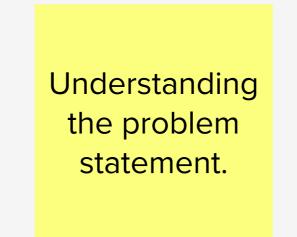

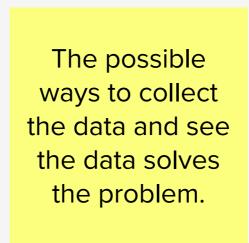

Group ideas

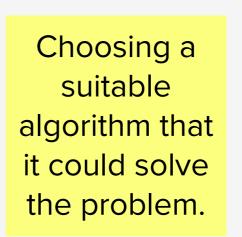

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

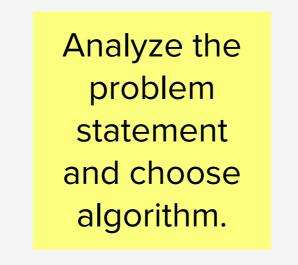

Grouping based on the problem

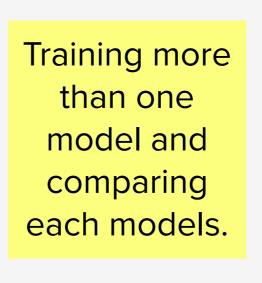

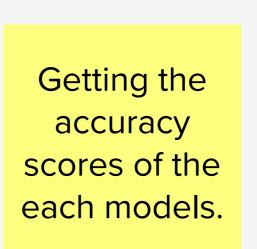

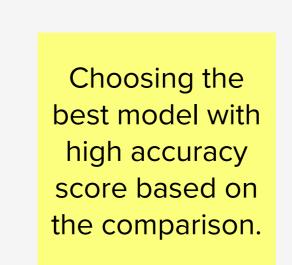

Grouping based on the model

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint

Define the components of a new idea or strategy.
